

## The gentle way to perfect skin conditions

### MULTIDIODE SLP™

#### What is MULTIDIODE SLP™?

It is NOT just some other kind of laser, but an aesthetic treatment system, comprising the most advanced and safest laser technology for gentle and efficient treatment of numerous undesired skin conditions.

#### Which treatments MULTIDIODE SLP™ can do?

If permanent hair removal, vitalizing skin rejuvenation, the elimination of small veins such as spider veins and red spots, or of freckles and pigmented blemishes - in any of these cases the MULTIDIODE SLP™ laser treatment results are most effective.

#### How does the MULTIDIODE SLP™ work?

Laser systems generate light and highly compress it. Thus a ray of high density is produced: the beam. The MULTIDIODE SLP™ optimizes this beam to a length and duration that is ideal to reach the area under the skin to be treated. There the light produces heat to stimulate the tissue or destroy the roots of the hair, depending on the desired effect.

#### Is the MULTIDIODE SLP™ treatment safe?

In expert hands the MULTIDIODE SLP™ laser beam does neither burn the skin nor hurt, being applied through a specially developed cooling system. This ensures maximum skin protection and patient comfort during and after treatment.

## Discover the secret of beauty

### MULTIDIODE SLP™

Please ask your physician for more details on this exciting and successful laser treatment technology to enhance your natural beauty.

appointed to natural perfection

Pigmented blemishes treatment  
Reconciles you with your looks

MULTIDIODE SLP™ skin improvement

Whether you have hated your freckles as long as you can think back or you dislike some brown pigmentation disorders - why don't you just get rid of them? With MULTIDIODE SLP™ freckles or brown sun and age spots are reduced about 80% in the treated area in just one session. This is possible, because the MULTIDIODE SLP™ laser energy is most effectively absorbed by the dark pigments of the skin. Just mind not to expose your skin unprotected to the sun before and some time after treatment.

Vascular lesion treatment  
Puts an end to camouflage make-up

MULTIDIODE SLP™ photocoagulation

If you are among the 60% of the population that suffers from spider veins, red or blue vein blemishes and other vascular problems MULTIDIODE SLP™ can free you from your symptoms.

Before After

Dr Serafin Fernández-Canadas - Madrid / Spain

The method is so easy, safe and effective that you can walk home right after treatment and enjoy the visible improvement of your skin condition.

Efficient hair removal  
Saves time, avoids irritation

MULTIDIODE SLP™ hair removal

This laser procedure effects the lasting elimination of undesired face and body hair.

The innovative MULTIDIODE SLP™ hair removal method is suitable for both men and women. It reliably stops hair growth between the eyebrows, in the moustache and other face areas, or in the armpit, on the legs, the breast and the back.

The final treatment results make annoying, painful or irritating hair removal procedures, such as waxing, shaving, depilating with cream or tweezers, belong entirely to the past.

Before After

Dr María Picornell, Dr Julián de Paz - Huelva / Spain

The number of treatment sessions needed depends on the individual hair color and phase of growth.

Skin rejuvenation  
Vitalizes your skin to youthful appearance

The MULTIDIODE SLP™ revelation

The secret of glossy, smooth, elastic and youthful skin is based on the body's natural ability to regenerate its own cells.

MULTIDIODE SLP™ skin rejuvenation treatment reveals this secret to you, independent of age, by stimulating the skin supporting collagen structures to increased and rapid regeneration.

The result is a vitalized, fresh appearance of your skin and an appreciable reduction of lines and wrinkles.

This gentle MULTIDIODE SLP™ procedure does not interrupt your daily routines, and has no unpleasant side effects such as discomfort or enduring reddened skin areas.
